

AusRock 2014: Third Australasian Ground Control in Mining Conference

5–6 November 2014, Sydney, Australia

The Conference

AusRock 2014 will provide an update to all mining industry geotechnical personnel on best practice in both Australia and overseas and exchange information between the coal and metalliferous sectors. The primary focus will centre around new technologies and developments, industry needs, mine site problem solving, and practical case studies. We invite all representatives including practical mine site operators, technical support staff, geotechnical engineers, mining engineers, consultants and researchers in the field of mining geomechanics and ground control to attend this internationally recognised conference.

Why attend AusRock 2014:

- A high level conference program presented by industry experts, designed to highlight technical knowledge
- Stimulating and inspiring keynote speakers
- The chance to learn and discover what others in your field are developing
- Connect with other professionals in your industry via the multiple networking opportunities including a trade exhibition and a conference dinner cruise of the Sydney Harbour
- Participate in challenging and engaging workshops

Sponsorship and Exhibition Opportunities

Showcase your business at this conference and take up a sponsorship package today. A trade exhibition will be held in association with the event and will provide an excellent opportunity for companies to display their products and network with delegates.

The sponsorship and exhibition package contains a variety of levels to suit individual marketing budgets. Contact event management today if you have any questions or would like to discuss your options.
